

BELOW GROUND SEPTIC & CISTERN TANKS

*Neither Sprayer Specialties, Inc. nor the tank manufacturer(s) accept responsibility for lost or damaged product due to the failure of any of the tank(s), tank fitting(s) tank valve(s) or the installation of the for mentioned items.

Septic Tanks

Ace Roto-Mold septic tanks are stronger, easier to install and less costly than old-fashioned concrete septic tanks - yet they still offer the quality construction and safety you expect. Manufactured from high-density polyethylene with U.V. inhibitors, Ace Roto-Mold tanks utilize a horizontal flo designed for below ground installations up to 36 inches. The 1000, 1250 and 1500 gallon double-compartment septic tanks have been tested by NSF to meet the IAPMO Z1000 and CAN/CSA-B-66 standards. Each tank carries an individual serial code and is fully documented from the date of manufacture, Ace Roto-Mold septic tanks are designed and manufactured with rigorous quality controls. The trapezoidal deep-rib design and interior baffl system make Ace Tanks the industry choice. Only Ace tanks feature a custom-molded gasket in the lid. Manufactured from extruded Nitrile rubber, the gasket snaps into the lid and ensures a watertight seal. Our exclusive lid design locks in place with nylon ties, eliminating the need for metal fasteners that can corrode and fail. Ace's unique tank baffl system slows the flo of waste-water and directs it to the middle of the tank so wastewater can separate from solids. An outlet baffl allow the partially treated liquids to flo out for further treatment. Advantages of Ace's baffl design include added strength, versatility, and ease of installation. Septic tanks are available in one-compartment and two-compartment designs and are manufactured for containment of liquids up to 1.7 specifi gravity.

SEPTIC TANKS				
Part#	Description	Weight	Dimensions	Price
AST-0300	300 Gallon Pump Tank	134	54 x 56	\$1,079.81

Cistern Tanks

Ace Roto-Mold cistern tanks are intended for bulk storage or collection of potable water and designed for below ground level installations. Tanks are manufactured from high-density polyethylene with U.V. inhibitors and feature a trapezoidal, deep rib design. Only Ace tanks feature a custom molded gasket in the lid. Manufactured from extruded Nitrile rubber, the gasket snaps into the lid and ensures a watertight seal. Our exclusive lid design locks in place with nylon ties, eliminating the need for metal fasteners that can corrode and fail. Ace Roto-Mold cistern tanks are FDA-approved for potable water and are manufactured for containment of liquids up to 1.7 specifi gravity.
