Model 6B

- Molded of corrosion resistant materials; all wetted parts are polypropylene, stainless steel and polyethylene.
- Maximum pressure of 150 PSI.
- Large capacity, 12 GPM pressure drop.
- Molded-in mounting flange and 1/4” NPT gauge port.
- Valves can be ganged together using hex nipple for multiple boom control.
- Easily repaired without removing valve from spray line.

**Part#** | **Description** | **Price**
--- | --- | ---
AA6B | Manual Control Valve | $68.16

**Example:** AA(B)6B

---

**Model AA17L**

For Selective Control of Three-Section Boom Sprayers at Pressures up to 300 PSI.

- Use to open any of three boom sections lines in any desired combination.
- Raise lever to open, lower lever to close the valve without changing the indexed position.
- Aluminum construction with stainless steel and plastic internal parts for maximum corrosion resistance.
- 3/4” Inlet/Outlet, 3 Boom Outlet & Accessory Outlet

**DirectoValve®**

**Model 23120**
- 302 stainless steel spring and EPDM O-ring
- Excellent chemical resistance.
- ¼” port for pressure gauge pipe plug included.

**Example:** AA17Y

**Sprayers at Pressures up to 300 PSI (20 bar).**

- Molded-in mounting flange and molded of corrosion resistant materials; all wetted parts are polypropylene, stainless steel.
- Maximum corrosion resistance.
- Positive lock nut to hold adjustment screw firmly in place.
- Extra large valve passages to handle full flow from supply line.
- Positive lock nut to hold adjustment screw firmly in place. Not affected by jarring and vibration.

**Model 6815**
- Available with pressure ratings 50, 300 or 700 PSI.
- Other models for high pressures up to 1,200 PSI are also available.
- Brass also available with hardened stainless steel seat.
- Specify PSI when ordering.

**Model 110**
- Removable bonnet for servicing unit without removing valve from line.
- Available in multiple sizes and pressure ranges.

**Model 8460**
- Flow rate to 56 GPM for 1/2" and 70 GPM for 3/4".
- 8460-50 uses stainless steel springs with 8460-50 uses stainless steel springs - responsive to pressure range of each valve.
- Extra large valve passages to handle full flow from supply line.
- Positive lock nut to hold adjustment screw firmly in place. Not affected by jarring and vibration.

**Valves and Manifolds**

**Manual Pressure Relief/Regulating Valves**

Bypasses excess liquid. Adjustable to maintain control of line pressure at any pressure within the valve’s operating range. Selected pressure setting firmly held in place by locknut. Extra large valve passages to handle large flows.

**How to order:**
- Type 23120 Polypropylene construction for maximum corrosion resistance.
- Excellent chemical resistance.
- Flow rate to 56 GPM for 1/2" and 70 GPM for 3/4".
- Advanced bonnet for servicing unit without removing valve from line.
- Available in multiple sizes and pressure ranges.
